

GEAR SHIFT CABLES

SHIFT AND SELECT CABLES FOR MANUAL TRANSMISSION

KEY FEATURES

- > MARKET LEADING DURABILITY
- > IMPROVED EFFICIENCY OF 6%-10% COMPARED TO COMPETITOR CABLES
- > LOW BREAKAWAY FORCE AND LOW LOSS OF MOTION
- > NO SLIP-STICK EFFECT
- > IMPROVED LUBRICATION DUE TO ADDITIONAL LUBRICATION CHAMBERS

PRODUCT DESCRIPTION

The gear shift cable is a result of our continuous effort to bring products to the market that bring additional value to the customers. It is based on the renowned Silver Line™ design and has inherited the performance characteristics from its predecessor.

However, due to the core design, which includes a non-flat wrap layout, the gear shift cable can transfer even higher loads at the same bending radius. It will also handle a larger number of misuse cycles compared to the conventional cable with flat wrap core.
